The various asylums for the intene in Texas have within the last four rears been the recipient of liberal appropriations at your hands and much has been done to alleviate the condition of this unfertunate chast of our citizenshin. However, there is yet room for improvement, and I bope that you will make such appropriations for new buildings and equipment as will remove every unfortunate to an asylum, where their needs and comfort can be obtained.

The same can be said of the institutions for the blind, the deaf and dumb, the orphann's home, the appleptic colony, the invenile training school and the tuberculosis sanitarium.

"I recommend that you make liberal appropriations for the support of all state educational institutions in Texas. In this connection, however, I want to aspecially call your attention to the

Receiveit, N. J., Jan. 18 Mayor Joseph A. Hermann announced today that warrante had been issued for the arrest of 12 deputy shariffs involved in the shooting Tuesday of 19 striking inhorters at the Leidig American plant of the American Agricultural Chamical company. They would be charged with manulausther, he said.

Mayor Hermann declared he was going to force the settlement of the trouble between the strikers and their employers. He said he had been asked by a committee of strikers to interview their employers regarding adjustment

of their differences through arbitra-tion.

"I had 150 of the strikers searched for arms directly after the shooting." he declared, "and not a single weapon was found on any one of them." One striker died of his wounds after the battle Tuesday and several were seriously wounded. The strikers claimed that is in all were shot.

Everybody Muss Share.

"Everybody must have an education in Texas, whether he or abe is able to buy it or not. When the destiny of our government is considered it is no time to talk about the technical proposition of taxation without representation.

"One of the ways that this idea can be put into practical electrics is to appropriate \$250,000 for the support of 100 sural high schools. "The asricatural and mechanical college and the state university seem now to be the subject of much discussion and concern to those interested in higher education in Teyas. The magnitude of legislation affecting these two institutions ought not to be underestimated.

"It is apparent to any fair minded person that Texas is today suffering more from a want of under education of the many than it is from a want of oxel education of the few.

"Too Much Higher Education."

"When we consider the 70,000 children in Texas a be never get a chance to school and against this put the fact that the Texas legislature is today being asked to appropriate over \$2.25 per student for the benefit of those fortunate enough and able to go to the A. and M. college and the university, you can begin to see that there is a real danger of semebody going hog wild about higher education. I have bought less than I have made! I have been fragal and economical I have been fragal and economical I have been free from wastaful and riotuus living? I have made investments in reasonable proportion to my own worth?"

"No poole who do not recognize and respect these simple truths can every survive misfortune, let alone rise to prosperity and affluence,

"We must start again and start aright, As a law making body, you will be beset and belieged by persons and politions ceeking in different forms and ways to cure these simple cylls by legislation.

"No law can be passed that will provide against wasteful extravagance, excessive expenditure or incorrect living.

Government Can Only Presect.

Government Can Only Pratect.

"The government can do much to protect property, but only the individual can produce property. The government can do much to aid in the marketing of crops. But the individual must produce the crops. The government can do much to aid in the marketing of crops. But the individual must produce the crops. The government can do much to bee that there is a fair division between these who labor and those who do not, but the government can produce no actual 'alues. You, as a legislature, can regulate many things, but you cannot produce wealth by statute.

"The will of the people should always be respected and carried into living laws and where any legislation does not plainly violate some expressed provision of the constitution, I take it that it is the duly of the legislature to use its best influence and offerts to reflect the will of the people, and where there is any doubt as to whether proposed legislation involves some constitutional power, I take it that no member of the legislature should in advance, constitute himself a supreme court. He should resolve all doubts in favor of the wish of the people, and strive to put their wishes into law, leaving technical questions of construction, and constitutional authority to the courts themselves.

Recommending for your special consideration, each and every plants of the Democratic platform adopted by the representatives of the people in convention assembled in the great city of El Paso on August 12, 1914.

The salient and important planks of this platform were issued in the inst campaign. These issues were discussed on both sides, by some of the ablest men in Taxas, and I take it that no one can now successfully insist that the platform as adopted, does not represent the wish of the people.

"It may be said further, without fear of contradicton, that no plank in the El Paso platform for the state.

"At least there is no plank in the lattour in advance of judicial determination." There are some matters of legislation. There are some matters school at the A and M. college or the establishment of a veterinary school at the university.

"The penitentiary system is the cancer carbuncle that is about to develop into slarming proportions. It is a cancer because it cats on the freasury of the people. 'I therefore suggest that the legislature look carefully into the question of constructing a system of public highways and if it can be found that convict labor can be successfully used to build permanent roads, that you pass such legislation as would give us plicel roads from one end of the state to the other, maintained by the state. Reforming the Courts.

"Much has been said, much can be said and much will continue to be said about how to reform the courts of the country. Some of the criticism is justified and sume is not.

"From 18 years' experience and observation as a country lawyer, a farmer and a business man, I have come to the conclusion that one of the main causes of the laws delays is the unequal distribution of the work of the trial courts.

of the laws delays is the unequal distribution of the work of the trial courts.

"In the cities where the population is dense and the volume of litigation is proportionately larger than in the country, we find that the trial judges are overworked and underpaid for the nervices performed. It would not be inequitable if they had even more trial courts than they now have. For instance, Dallas county and Harris country now have 10 times as many people and 50 times as many courts. "In the country under the system of atate terms of court, we find that the courts are not engaged as continuously as in the city.

Suggests Remedy.

"As one of the remedies for reform in court procedure I would suggest that all district court districts be arranged so as to have an equal population as near as practicable to each district court. I would then abolish all terms of court and keep every court open for business all the time with the exception of one month's vacation each year, and require all parties concerned to answer process in ten days after nextice.

"I would retire all district judges at

to answer process in ten days after service.

"I would retire all district judges at \$1 years of are, and sooner if they did not work or learn some law.

"I would then increase the number of courts of appeals by about two and one will probably do for the present. I would make their jurisdiction final in all cases arising in the county courts and such other cases as now provided in the constitution.

Platform Demunds.

"The platform demands relating to the public health, the abollshment of the fee system for paying peace officers, and the protection of the livestock industry of Texas are all matters that should, and I am sure will receive your careful consideration.

"The protection of our forest reserves is an important question, that has not and the attention which it demands. An investigation of the facts shows that our timber supply is vanishing with alarming speed. I suggest that a commission be appointed to study the question of necessary legislation bearing on this question.

The Land and the Man.

Texas has so many homeless people and so much vacant and unused land suitable for homes that the work of the Skill legislature would not be performed unless some effort was made to pass legislation that night bring together the landless man and the homeless land.

Much thought has been given in late years to the subject of maternity. In the cities there are maternity hospitals equipped with mod-

equipped with modern methods. But most women prafer their own homes and in the towns and villages must prefer their own homes and in the towns and villages must prefer them. And since this is true we know from the great many spisadid letters written on the subject that our "Mother's Friend" is a great help to expectant mothers. They write of the wondarful relief, how it seemed to allow the muscles to expend without undus strain and what a splendid influence it was of the nervous system. Such helps is "Mother's Friend" and the broader knowledge of them should have a helpful influence upon bables of the future. In a little book for such women thempoints are more thoroughly broaght out In a little book for such women those points are more thoroughly brought out and a copy will be malled to anyone who will send us their name and address.

"Mother's Friend" is said in all drug stores and highly recommended for its timely usefulness, its anisness and the real belp it affords. Ask for it at the store and write us for the book. Bradfield Regulator Co., 511 Lanuar Bidg., Atlants, Ga.
